 Maadi, Cairo

### EXPERIENCE

#### Nis

Associate to the Principal

- (2019-2020)

#### Observer Studio

React Front-End Developer

### LATEST PROJECT

#### Audio Store Website

I worked on Audio E-commerce store to promise an elevated online shopping experience. Boasting a user-friendly interface, the platform allow the following:

- Add/Remove products from the cart
- working with Firebase as the back-end and Apl.
- Edit product quantities in the cart
- Fill in all fields in the checkout
- Receive form validations if fields are missed or incorrect during checkout
- See correct checkout totals depending on the products in the cart
- Shipping always adds \$50 to the order
- VAT is calculated as 20% of the product total, excluding shipping
- See an order confirmation modal after checking out with an order summary
- View the optimal layout for the app depending on their device's screen size
- See hover states for all interactive elements on the page
